

Have you ever flown through the Alps during your therapy ?

ICAROS combines effective training with unique virtual reality experiences.

Boost your success in ortho and neurorehabilitation by inspiring your patients with ICAROS Health. As they engage in effective training, they'll embark on thrilling flights through virtual worlds and stunning photorealistic landscapes. All with the convenience of VR goggles or a tablet screen.

ICAROS Health explained:

Discover all you need to know about the applications, users, installation, and operation of the ICAROS Health System in a 2-minute video.

More motivation and success for your patients

Machine-based exercise can be monotonous. With the ICAROS Health, you increase your patients' motivation for training. Through purposefully designed games, the workout is diverse, varied, and measurable.

The ICAROS NEXT software adapts gradually to the users' progress and increases training success in a playful way. The ICAROS Health system is well-suited for people with physical limitations.

What are the effects of training with ICAROS Health?

- Strengthening of the core muscles
- Training of coordination
 - Balance
 - Reaction
- Improvement of body posture
